

***Without the core, the “world” of today, and likely future,
would not exist.***

***Clean water we drink, sewage we flush, refuse we discard,
vehicles and equipment we use, law enforcement and
emergency services we rely on, streets we drive on, food
we eat, lights and computers and appliances we enjoy,
social services we may depend on, buildings and homes
and offices we live and work in, land we live upon.....are
all reliant on the Public Works profession.***
